A Permanent Eclipse Committee of Fellows of the Royal and Royal Astronomical Societies has been formed for the consideration of the observation of future eclipses, and the discussion of records of those in the past. Solar Activity in 1894. The principal feature of the solar activity in 1894 as compared with 1893 has been a distinct falling off in the mean daily spotted area. December 1893 had been an exceptionally active month, the mean daily area being larger than for any other month during the present cycle, except August 1893, and the number of distinct groups and of separate spots being even disproportionately great. The decline which was witnessed in the early days of 1894 was therefore the more marked, and except for the appearance of a specially fine group towards the end of February, that decline continued until the end of March. A revival...
