Brand New Book ***** Print on Demand *****.Excerpt from Genetic Philosophy of Education: An Epitome of the Published Educational Writings, of President G Stanley Hall, of Clark University In this book I have tried to present, for students and all interested in education, the main teachings of the genetic school as these are formulated in the writings of its most enthusiastic and strongest representative, indeed we may say its creator, President G. Stanley Hall, of Clark University. In a word, my book is an epitome of the published writings of President Hall, and is solely that. I have added nothing I have not found in his writings, and I have drawn from no other sources. Though the influence of his work, which I think we may justly claim to be the most important contribution of all times to the philosophy of education, has now been felt in every department of the school system, and in all fields of activity, in which human welfare is an ideal, both at home and abroad, this philosophy as a whole seems still inaccessible to a great many who need to have it in a simple and comprehensive form. At the close of 1909 President Hall's collected works included two hundred and ninety-five titles of books and articles, almost all bearing upon the subject of education.
