Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The ABC of Cost Engineering The author's object is to make it possible for the busy executives of American manufacturing enterprises to grasp in minimum time, at least in outline, the principles and advantages of the newest and most practicable methods of determining the cost of producing and selling the products of their factories. It is an unfortunate fact that at the present time a great majority of manufacturers, following traditional practices, are confidently leaning upon cost accounting methods which delude them into the belief that they are more successful than is actually the case. Not infrequently it is made to appear that their businesses are being profitably conducted when as a matter of fact they are losing money.
